

Too many  
**clicks**  
make life difficult ...

**TARGIT your decisions in fewest clicks!**

What the  
**experts** say  
about TARGIT ...

” One key differentiator for TARGIT is the holistic approach to BI. Their focus on how BI should bring value to user and the whole context in which BI is used is unique, compared to feature focus that other vendors may have. Another differentiator is the attitude towards fewer clicks meaning that the end-user should use as few clicks as possible to reach the required data”

Brian Troelsen,  
Senior Research Analyst, IDC

” TARGIT offers useful analytical capabilities and an unusual graphical interface. End-users will have no trouble creating, modifying and navigating multi-object graphical screens. It also has good integration with Microsoft Reporting Services, allowing end users to create new reports on-the-fly.”

Nigel Pendse  
The OLAP Report

# TARGIT BI Suite

**Dashboards, analyses and reports**  
**in fewest clicks possible**

## TARGIT your data and make better decisions

To TARGIT something is all about doing things differently. When you choose TARGIT BI Suite, you choose the fastest way to new knowledge. The solution gives you a full overview of the myriads of data hidden in a company's wide variety of IT systems.

All employees are provided with a common user interface from which they can extract exactly the information they need. In fewest clicks possible data from all departments and business areas are transformed into insight.

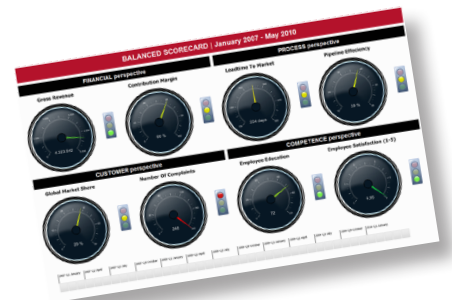

This offers all employees a solid basis for taking action when necessary and making the best decisions.

## Integrated dashboards, analyses and reports in few clicks

TARGIT fights all unnecessary clicks that only make your life difficult. TARGIT BI Suite has a very unique and intuitive user interface – you have to see it to believe it! You will experience an integrated and ready-to-use set of tools which enables you to create intelligent dashboards, revealing analyses and insightful reports in fewer clicks than with any other Business Intelligence solution on the market.

You get new insight and can optimize the performance in all areas of the business.

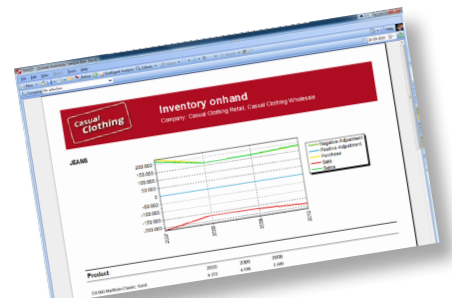

TARGIT BI Suite is so easy to use that all employees can follow trends, create all types of analyses, and make decisions – fast.

**TARGIT BI Suite**

# TARGIT BI Suite

**gives you all this...**

## **Analyses**

With just a few clicks, users can create and navigate intuitively in the most advanced analyses. All objects in an analysis are dynamically interrelated, and with a single click on a dimension in an object, this dimension will be adapted as a criterion to other objects in the analysis. In addition, detailed explanations are added.

## **Reports**

All types of reports can be created in no time. You can also freely distribute reports across language barriers and physical boundaries, for example via email or websites.

## **Intelligent Dashboards**

Dashboards and scorecards provide an overview of company performance through interactive gauges and built-in intelligence. You can quickly identify the company's biggest problems and opportunities.

## **Meta Morphing**

The patented 'engine' in the TARGIT solution remembers your preferences for presenting your data. The technology automatically chooses the settings that you prefer, thus makes it possible for you to save clicks.

## **Hyper Related OLAP**

Your analyses, reports or dashboards don't have to be static. A single click on any given figure opens a detailed analysis and allows you to further examine the results.

## **Sentinels**

Sentinels are prediction based rules that will allow you to get an early warning. With Sentinels you can expand the horizon for your notification agents and can therefore react faster if the environment around your organization changes.

## **Storyboards**

A series of real-time analyses can be published as a video, a slide show or a podcast. Distribute data on a large screen and inspire everybody to act in alliance with the company's goals.

## **Choose among several languages**

You can always choose to view analyses in your own language, regardless of the language used when the original analysis was created. TARGIT is currently available in 16 languages and more will be included.

## **Alerts from Intelligent agents**

A wide variety of intelligent agents are incorporated throughout the solution. They help ensure that the organization can react quickly to market changes. The system will for instance automatically send you an e-mail when certain goals or numbers are or are not reached.

## **TARGIT via the Internet**

With the web license you can access company data, reports and analyses anywhere in the world. You can create analyses and work with full data security in real-time.

## **Info from TARGIT on your desktop**

Intelligent Dashboards and analyses are integrated with your Windows Desktop. You will have access to TARGIT information – before the TARGIT suite has been opened – and you can quickly react to critical deviations. You can get important business insight at the right time directly on your iPhone or iPad with the TARGIT iTop, which is an add-on to the desktop client.

## **Intelligent Search**

Learn more about the context of any active analysis. One click combines structured analysis data with unstructured data from your e-mails and other documents. Intelligent Search is a ground-breaking feature – never seen before in the history of BI!

## **What-If Simulation**

With one single click you can find out how your figures will change if the turnover increases or decreases – globally or locally. The What-If Simulation functions primarily as drill-down, and it uses the information that you have already given the system.

**...and much  
much more!**
