

# TARGIT BI Accelerator

## Get Business Intelligence in just one day!

Integration  
to  
Dynamics NAV

TARGIT BI Accelerator turns your valuable Microsoft Dynamics NAV data into meaningful dashboards, analyses and reports in as little as a day.

In no time at all, you could be monitoring your sales force, drilling into your P&L statement or exploring the optimization possibilities of customer relations using the intuitive and user-friendly TARGIT user interface.

### Dynamics NAV integration in few clicks

BI Accelerator offers a fast and easy way of setting up a fully operative TARGIT BI solution in few clicks while eliminating the challenging technical tasks related to implementing a BI solution. BI Accelerator combines the synergies of the powerful TARGIT BI Suite and Microsoft SQL Server platforms with best practice Data Warehousing skills harnessed from TARGIT's 10 years in the BI industry. Add to this the extensive knowledge about Dynamics NAV in TARGIT and the TARGIT reseller channel, resulting in the most powerful and easy to use BI integration tool on the market!

### Minimize investment – maximize return

With BI Accelerator, your initial BI investment is minimized and you get instant Return on Investment. Standardized analytical cubes optimized for your data are implemented and ready for use. This saves the extensive costs incurred by weeks and weeks of consultancy and allows end-users to get started with the full range of BI functionality, applying minimal technical resources.

### Meets your BI requirements

The analytical cubes meet the majority of the requirements of a BI solution for first-time and experienced BI users. BI Accelerator bridges the gap between operational data in the Dynamics NAV database and BI measures (KPIs) and dimensions that can be turned into dashboards, analyses and reports swiftly and easily in TARGIT BI Suite. The acceleration process includes data transfer, data quality and validity assurance, performance optimization and organization of data into logical business areas, adopting terminology that allows Dynamics NAV savvy end-users to easily familiarize themselves with the TARGIT BI solution.

### Running TARGIT BI Accelerator

One of the key benefits of BI Accelerator is that it requires minimal user intervention. When TARGIT BI Suite and MS SQL Server have been installed, only a few additional inputs are needed in order to start the acceleration process. Input is gathered in the intuitive step-by-step interface. No knowledge about BI or Data Warehousing techniques is needed in order to use TARGIT BI Accelerator!

Choose Acceleration option

Run Acceleration process

Use TARGIT BI Suite

You can try TARGIT BI Accelerator for free for 30 days.

TARGIT BI Accelerator is available for download from the TARGIT website, [www.targit.com](http://www.targit.com), and includes the full TARGIT BI Suite.

### Technologies

BI Accelerator is based on the TARGIT BI Suite front-end and the Microsoft SQL Server backend and utilizes the full range of business intelligence tools and components included with Microsoft SQL Server, including:

- Microsoft SQL Server
- Microsoft Analysis Services
- Microsoft Integration Services
- Microsoft SQL Server Agent

BI Accelerator is available in SQL Server 2005 and SQL Server 2008 editions.

### The acceleration process

The acceleration process includes the following conceptual steps:

- Gather user input
- Create relational Data Mart database
- Create multidimensional cube database
- Create Extract, Transform and Load (ETL) package
- Create daily schedule of ETL package
- Execute ETL package
- Optimize multidimensional cubes
- Configure TARGIT BI Suite

### Dynamics NAV platforms

BI Accelerator supports Dynamics NAV on both SQL Server and Native database platforms.

### Dynamics NAV versions

BI Accelerator supports NAV versions 2.60, 3.01, 3.10, 3.60, 3.70, 4.0, 5.0 and 2009.
