

**Easy to Use!**  
**Flexible**  
**Professional-looking MSDSs**  
**Meets OSHA, ANSI, GHS, Canadian and European Standards**  
**Designed Specifically for MSDS Authoring Professionals**

MSDS Generator is formatted according to the ANSI Z400.1-2004 standard, officially accepted by OSHA, Canada (WHMIS), the European Union (REACH) and now the Global Harmonization System (GHS). Easily jump through its 16 major sections with numerous subsections for each are used to create the MSDS you want.

Chemical manufacturers and suppliers can categorize and filter their MSDSs by product type for easier MSDS management. Consultants producing MSDSs for multiple clients can filter their MSDSs by group or product type, supplier/client and MSDS status type.

Dazzle your customers by enhancing the appearance of the MSDS using colors, rich text controls (e.g., bold, underline, italics), safety pictograms and company logos

Increase the comprehension of your MSDSs to the average worker. The standard software includes a library of over 120 color graphic pictograms for health hazards, storage and handling, transportation symbols, and PPE. All new GHS pictograms are already included in the software. Add pictograms of your own to meet your needs and apply them to virtually all MSDS sections.

A **Standard Phrase Library** of over 700 MSDS and label phrases has been compiled from -

- ANSI labeling standard
- European Safety & Risk Phrases
- First Aid Manual for Chemical Accidents

Add your own general and section-specific standard phrases from easy-to-use pull-down menus.

The **Product Name Masking** feature allows private label naming of MSDSs. Create 1 MSDS and give it multiple names that may be inserted at the time of printing or based on the customer purchasing the product.

**Customer Tracking and MSDS History** - Small companies can now track their customers directly using the software. The history file determines which customers require an updated MSDS whenever they change. User-designed form letters permit easy distribution on your letterhead.

**MSDS Word/Phrase Templates** provide an easy method to translate any standard phrase or section heading on the MSDS. This method permits English standard phrases to be used on MSDSs then translated even to foreign languages. (Note that MSDS Generator does not include the actual language translations however.)

MSDS Integration

#54100C Int. Blue PP Conc. - Production Formula

General

No. . . . . #54100C (m) Search Name . . . . . INT. BLUE PP CO...

Description . . . . . Int. Blue PP Conc. Version Nos. . . . .

Management . . . . . UQM Active Version. . . . .

Specified for Item . . . . #54100C Last Date Modified . . . . 02/04/09

Item Description. . . . . Int. for Blue PP Conc. Total Percentage . . . . . 0.00

Unit of Measure Code . . . . 363 Total Estimated Cost . . . . 1,127.76

Base Unit of Measure . . . . GRAMS Status . . . . . Certified

Qty. per Unit of Measure 363
